Youth and Tech in the City

Adama Sarr (Senegal)

Key words: Keyword 1; Keyword 2; Keyword 3

SUMMARY

My presentation will focus on the youth and new tech in the city. I will give breve presentation about how young people appropriated the new surveying technologies. By using them they should know what is positive or negative fro them and we could give them solutions for a better using.

And also how new technologies can contribute to achieve the development goals or how they can accelerate the development in surveying fields.

Also will talk about surveying start-ups. How young surveyors could create a start-up commission or committee to boost young surveyors' s to create they own start-up on surveying. What will the role or the support of FIG and its members (associations, academics…)?

To finish I will talk about youth and smart cities and BIM. The role of YS in building smart city, progress and development of smart cities and the role of youth.
